

It's a dream come true. Actually driving in me car, listening to the music of my choice and not having to listen to commercials!!! I pay for the service just for that reason... for years it's been my biggest complaint about fm radio.. Now the thought of any restrictions make absolutely no sense. please allow free compition to exisit.. If FM radio stations want to remain in today's markets.. make them raise the bar.. come up to the plate and offer a product that people really want.

rejecting NAB's petition 04-160 would ensure the public would recieve only better programming by both XM and FM

thanks
